

NOW WITH A SLIGHTLY BIGGER ENGINE.

For those with a lust for power, we proudly present the 1.7 litre Volvo 340.

It's just like the 1.4 litre Volvo 340.

Same welded box-steel safety cage with energy-absorbing crumple zones front and rear.

Same heavy-gauge steel side-impact protection bars in the front doors.

Same high-impact laminated windscreen.

But that extra capacity under the bonnet produces extra horsepower under your right foot.

Despite that, the engine is remarkably economical for its size. (At 56 mph, it's over 5 mpg better off than the Vauxhall Astra 1.6 SR.)

It is also extraordinarily quiet.

A fact you'll appreciate when you switch on the

stereo cassette/radio (now fitted as standard).

And if you don't believe what you see in the picture, we might add that the experiment was conducted under the scrutiny of an AA inspector.

The whole thing was done on the level - not

downhill with the wind behind it.

In case you're wondering, the transporter and its cargo of 7 Volvo 340s added up to a total of 18 tons.

About the weight of 12 medium-sized caravans, 72 small sailing dinghies, or one Trojan horse-box.

To: Volvo, Springfield House, Princess Street, Bristol BS1 4EF.
