

PSST! THE VOLVO 360 IS 35% QUIETER.

Have you heard about the Volvo 360's improved piston design, lighter crankshaft and reverse-flow exhaust system?

They reduce engine noise.

Has word of our new-style windscreen pillar trim and redesigned door seals reached your ears?

They reduce wind noise.

Did news of our improved engine bulkhead insulation and parabolic tapered single-leaf rear axle springs filter through the grapevine?

They reduce road noise.

The whisper is, all these things add up to a 35% reduction of perceived noise level inside the car at cruising speed.

Despite that, the car is actually more powerful (thanks to the new engine design).

And more economical (thanks to the new aerodynamic design).

Now doesn't that sound like the best thing you've heard all day?

To: Volvo, Springfield House, Mill Avenue, Bristol BS1 4SA.
